**Subject:** RE: Notification Letter - PFAS ESI Field Work, Seneca Army Depot

Beth and Randy,

Thank you for the notification letter.

The notification letter states that the wells will be installed with flush mounted completions instead of the originally proposed stickup construction. While this may make it harder to locate the wells for any potential future sampling that might be needed, it is acceptable as long as the well locations are surveyed and the gps coordinates are provided in the ESI report. Please confirm that this will be the case.

Thank you, and please let me know if you have any questions. Good luck with the proposed fieldwork.

Bob

**Subject:** Notification Letter - PFAS ESI Field Work, Seneca Army Depot

All:

Please find attached the notification for the commencement of fieldwork for the PFAS ESI at Seneca Army Depot. We plan to mobilize on May 6, 2019 to start the drilling.

A site map showing proposed sampling locations and a project schedule are attached to the notification letter.

Thanks,

**Beth Badik**
